

INDICO SYSTEMS - *Indico Recorder*

The *Indico Recorder* is a proven, intuitive and easier way to secure digital recording. It has all the functions you need for the accurate recording of live situations and comes with options of fixed, mobile and movable cameras.

Indico Recorder is the ideal solution and replaces technology that is out-dated, proprietary and prone to failure. It is available as a standalone solution, or can be connected to Indico Digital Evidence Server that allows for a fully networked solution.

The screenshot displays the Indico Recorder interface. At the top right is the Indico Systems logo. The main menu includes buttons for 'Audio And Video' (Starts the interview with audio and video), 'Audio only' (Starts the interview with audio only), 'Back' (Returns to previous page), and 'Import' (Starts the import process). Below this is the 'Interview report' form, which includes fields for 'Interview type' (Suspect), 'Case number' (7075254590), 'Interviewer', 'Department', 'First name', 'Surname', 'Personal ID', 'Birth date', 'Gender', 'Nationality', 'Remarks', and 'Date and Time' (07/02/2017 07:53:01). The form also has 'BACK' and 'NEXT' navigation buttons. At the bottom, there are buttons for 'Start' (Starts the recording), 'Stop' (Stops the recording), 'Bookmark' (Adds a bookmark on the current position to the recording), and 'Blank Screen' (Switches the view to a screen saver mode). A video preview window shows a recording in progress with a timestamp of 00:00:37 and a date/time of 01/11/2016 16:01:38. The bottom of the interface features the Indico Systems logo and three small icons representing different camera types.

- **NEW:** Multi-channel audio (max 8)
- Fixed or portable configuration
- Audible and visual warning and status updates
- Ensures recordings authenticity
- Server Management connectivity
- PACE/MoPI compliant
- 3rd party Audio/Video import
- Store, burn or upload recording
- Touchscreen optimized
- Multi lingual support
- Non-proprietary formats
- Windows based
- Advanced control
- Burn via Disc Producer
- Remotely controllable
- Playback/preview while recording
- Bookmark crucial events

One Application - *Multiple Solutions!*

- Ideal for dedicated interview rooms
- Easily customisable for child centres
- Scalable and Upgradable
- Recommended setup:
 - DIR-optimized desktop
 - Two PTZ HD-Cameras
 - Two High-sens Microphones
